

Cleaner A

Permabond CLEANER A is a general purpose industrial cleaner for cleaning and degreasing surfaces prior to bonding with any Permabond adhesive. Where surfaces are greasy or dirty, wiping with CLEANER A will help to produce a suitable surface for bonding.

CLEANER A is available as an aerosol spray for ease of application and has been developed to be simple and easy to use, helping to ensure that components are clean, even when the bond area is difficult to access.

Ideal for cleaning greasy, oily or contaminated surfaces

Directions for use:

- Remove excess contamination from the surface using a rag.
 - Hold the can of CLEANER A above the surface and spray onto the contaminated area.
 - Wipe clean using a rag.
- ALTERNATIVELY
- Spray CLEANER A onto a clean rag and use this to wipe over the surface.
 - Leave surface to evaporate dry.

CLEANER A is formulated using solvents which are designed to minimise any attack of the common engineering plastics. However, it is recommended that the product is tested to confirm compatibility, prior to use in production.

Storage:

CLEANER A should be kept in the original container, firmly closed, away from direct sunlight and heat, at temperatures of between 5-25°C. Under these conditions, the shelf-life will be 12 months from the date of despatch from Permabond.

Handling:

Full information can be obtained from the Material Safety Data Sheet (MSDS). Users are reminded that all materials, whether innocuous or not, should be handled according to the principles of good industrial hygiene. CLEANER A is flammable and containers should be stored in a cool place, away from direct sunlight.

The information given and the recommendations made herein are based on our experience and are believed to be accurate. No guarantee as to, or responsibility for, their accuracy can be given or accepted, however, and no statement herein is to be treated as a representation or warranty. In every case we urge and recommend that purchasers, before using any product, make their own tests to determine, to their own satisfaction, its suitability for their particular purposes under their own operating conditions.
